

V I Engineering Staffing Services

Providing Outstanding Test Engineering Personnel

Test Engineering Expertise for Hire

V I Engineering, a leader in the test engineering community, has a division called *VIE Staffing* dedicated to providing temporary and permanent placement of test engineering personnel.

VIE Staffing was designed to fill client needs outside of the standard project based services provided by V I Engineering. VIE Staffing addresses client managed projects when temporary or permanent on site engineering resources are desired. VIE Staffing's specialty is providing resources for test and engineering departments with excellent skills in National Instruments LabVIEW™, TestStand™ and LabWindows/CVI™. VIE Staffing has the unique capability to understand the requirements of test engineering system development and match the capabilities of engineering talent to client needs.

Each candidate is screened before interviewing with clients. VIE Staffing has developed a library of tests for different levels of job classification that help objectively assess candidate skills.

Key Benefits

- ◆ From your first contact, you will be greeted by industry experts in test engineering saving time establishing a clear understanding of your requirements
- ◆ VIE Staffing has a keen awareness of superior talent in the test community from our 13 year history of networking with thousands of people in test. Most candidates come from referrals, not resume banks
- ◆ Comprehensive qualifying and screening each candidate's skills means less time for you sorting through resumes
- ◆ Should your staffing or workload needs escalate, V I Engineering can quickly step in and offer fixed price project help
- ◆ VIE Staffing offers you the best of both worlds; excellent resources at reasonable rates

Save the anguish of flipping through endless resumes or working with "me-too" staffing companies by selecting with a company that has set the standard for programming excellence in the test marketplace.

Results Whenever You Need Them

VIE Staffing can fill the role:

- ◆ Project Management
- ◆ Architects
- ◆ Systems Engineers
- ◆ Software Developers

You should expect quality resources the first time.

Complete Test and Measurement Solutions that Exceed Expectations

How It Works

**We offer a simple
no hassle approach.**

We start with an initial discussion between you and one of our specialists to understand your technical and business requirements as well as questions about your company culture and work environment. We will discuss our normal

process and make any necessary adjustments to work within your HR policies. A Client Services Agreement is executed that addresses many client concerns such as intellectual property and non-disclosure as well as defining the commercial terms of our services.

Candidates for the position are screened for adherence to technical requirements and for suitability to your company culture and work environment. The technical ability of a candidate will be addressed by one of our senior technical resources who is an expert in the particular area being assessed. We offer help to candidates which may need assistance for matters such as relocation. Reference and academic checks are always performed before a candidate is placed. The timeline from first contact to first day of work can be as short as one week!

V I Engineering

V I Engineering is an experienced systems integrator that provides automated test and measurement systems, engineering information management, and LabVIEW productivity tools to Fortune 500 customers in the automotive, life sciences, manufacturing, and aerospace industries. We are also a leading Select Integrator in National Instrument's Alliance program.

VISTA

VISTA is V I Engineering's branded line of software tools, process consulting, and advanced design training that improves programming productivity and quality through the implementation of software engineering best practices for the development, management, and release of LabVIEW and TestStand applications of any size.

ENGINEERING INFORMATION MANAGEMENT

The EIM division delivers technical data management solutions that drive efficiencies into test lab operations providing increased productivity, faster time to market, visibility, throughput, traceability and consistency. The solutions provide easy access to real-time and historical information from a central repository. Tests can be centrally managed starting from creating test requests to scheduling, to test execution, and to post test analysis and reporting.

CUSTOM FABRICATED HARDWARE

With the addition of experienced hardware engineers, V I Engineering now designs and fabricates a wide range of PCBs and fixtures. Plus, our new 3,000 sq. ft. build area allows us to fully assemble and validate almost all types of automated testing equipment in-house.
